

Masquolate Fe AP 600

Iron chelate

Composition

Iron (Fe) soluble in water: 6,0 % w/w

Characteristics

– Aspect: dark brown microgranules.

Thanks to its specific and innovative composition EDDHSA chelating molecule (high ortho-ortho isomer) represents a highly performing formulation to prevent and overcome ferric chlorosis incidents.

Product use is recommended in all crop in which fisiopathy related to lack of iron can happen

Cultures

It can be used in all crops.

Instructions of use

We recommend treatments at the end of Winter-beginning of spring in order to achieve best results. There are different application methods:

DIRECT TO THE SOIL. Product is diluted in enough water and directly applied to the root. It is recommended in this case watering field just after.

DRIP IRRIGATION. In this case, it is recommended to apply product in two steps: 60% during sprouting and 40% during fruit growth stage. It is always interesting to share total dose to apply in as many applications as possible.

SOIL INJECTION. Carry out 5–8 injections into the soil for each tree at more or less 30 cm depth.

Dose

Application	Young plant	Mature plant
FRUIT TREES & CÍTRICS	30 gr/tree	75 – 125 gr/tree
GRAPES	5 gr/plant	15 gr/plant
HORTICOLES	2,5 kg/Ha	5 Kg/Ha
FLOWERS/ ORNAMENTALS	2 gr/m ²	6 gr/m ²

Packing

Product can be supplied in aluminium bags of 1, 5, 15, 20 and 25 Kg and 500 Kg big-bag.

It is recommended not to exceed advised dosages.
