

Miscellaneous
BB-5 SL

Soluble Liquid

Plant Protection and Inspection Services License. No.: 503/הצ/87

Acidifier for landscape spraying along with defoliation, nutrition, growth inhibitors, herbicides and mites

Package: 1, 5 liters

Contains: 600 g/liter (alkyl phenoxy polyethylene ethanol + acid buffers, mixture of non-ionic and anionic components).

General: BB-5 is a buffer-acidifier intended to improve results herbicide, nutrient, defoliation, mite killer and growth regulator results when sprayed on foliage. Contains: wetting materials, flattening materials, acid, PH marker. BB-5 lowers PH. The surfactant acts as a buffer and in any event, PH does not go below 4. The surfactant contains a dye that serves as a marker for attaining the appropriate PH level, with no need for complex tests. BB-5 has excellent wetting and spray drop flattening properties. The preparation improves spray penetration of the foliage and prevents the hydrolytic decomposition of pesticides in a base environment. In addition, BB-5 improves the capacity for mixing pesticides in the spraying preparation.

Instructions for Use

Combined Preparation	Crops	Use	Concentration
MG18	Cotton	Defoliation	0.1-0.2%
Drop Ultra			
Agri-Gibb 4	Grapevine, Citrus, Flowers, Persimmon, Pear	Improving hormone activity	
Tivag 40			
Agri-Gibb 40			
Vertimec	Tomato, Eggplant, Pepper, Flowers, Strawberry, Cucumber, Melon, Watermelon, Spices Citrus	Improving mite destruction	0.1-0.2%
Agriron			
Nanovatz	Citrus	Solving deficiencies	0.05%
Zinc Sulfide Manganese Dioxide			
Dormex	Grapevines (Superior, Thompson, Merlot, Perlette)	Improving awakening	3% with Dormex or Dorcy (1%)
Dorcy			
Potassium Nitrate	Apple	Improving awakening	2% (with 7.5% potassium nitrate)
