

Fertilization and Nutrition

Aminostar Powder

Contains: Total amino acids: 85% of which 19% Free amino acids, 4% potassium and 14% nitrogen

General: Aminostar Powder contains an especially high concentration of animal-based L-amino acids, which is much more effective. The product boosts enzymatic activity and protein synthesis, improves photosynthetic efficiency, encourages growth and is especially effective in treating stress conditions.

Application: Suitable for all crops, mainly in growth, blooming and fruit formation stages, and before and during stress conditions.

Dosage:

Spray: 0.2-0.25%

fertigation: 200-400 g/dunam
