

Super Fertilizer Series Primax

Biostimulant for enlarging fruit in fruits and vegetables | Contains: 13% potassium in carboxylic acid configuration. 26% polysaccharides, 3.5% auxin precursors.

General

Primax is a unique biostimulant intended to enlarge fruit diameter and weight and increase sugar content. The preparation is rapidly absorbed by the plant, encouraging cell division, improving fruit texture and extending shelf life.

*Does not contain hormones.

Crop	Spray Dosage	Fertigation cc/dunam
Greenhouse vegetables	0.2-0.3%	200-400
Open field vegetables	0.3-0.35%	250-500
