

Aminostar Solution

Contains: Contains amino acids from plant sources

General: A foliar fertilization product containing nitrogen and animal-based amino acids. Intended to accelerate plant growth and nutrition processes, containing a variety of amino acids, plant hormones and vitamins found natural in plant extract derivatives.

Objectives

- Boosts enzymatic activity and protein synthesis
- Improves growth
- Encourages photosynthesis and natural hormone production.
- Reduces frost and stress damages

Application: Amino is recommended at all growth stages, specifically for new growth, blooming, fruit formation and climatic stress conditions.

Dosage:

Foliar spray: 0.3-0.5%

Ground fertilization 0.5 l/dunam per application, 3 consecutive applications
