Bioauxin

Ecklonia Maxima Kelp Extract containing Natural Auxins

Contains: 100% Ecklonia Maxima kelp extract

Bioauxin is water-based and low temperature extract of the Ecklonia Maxima kelp, a green kelp found in the Atlantic Ocean, containing a high concentration of auxins.

Bioauxin boosts root generation, increases root mass and helps with mineral and water absorption. When applied during blooming and fruit formation bioauxin improves fruit formation and increases fruit size.

Crop	Treatment Time	Spray Dosage	fertigation Dosage
Fruit trees, citrus and olives	Saturation – After planting Spray – Before blooming and during fruit growth	0.2-0.25%	1-2 l/dunam
Vegetables	After planting for root establishment and after fruit formation	0.2-0.25%	0.5-1 l/dunam
Field crops	Before blooming and during fruit formation	0.2-0.25%	0.5-0.25 l/dunam
Flowers	Before blooming	0.15%	0.5 l/dunam
