

Kalon Actiflow Ca-Mg

Nutrition and Fertilization

Microelement enriched calcium magnesium Contains 224g in 1l calcium nitrate | 30g in 1l magnesium | Iron, manganese, zinc, EDTA copper + boron and molybdenum

General

This complex and unique fertilizer is a source of nutrition, as well as CA and MG deficiency prevention and control. Thanks to its chemical and physical ingredients, the product enables maximum foliage absorption. The calcium, along with magnesium and microelements (iron, manganese, zinc, boron), effectively penetrates the foliage, immediately reacts to deficiencies and prevents fruit cracking.

Objectives

- Strengthening fruit/vegetable cell wall
- Repairing deficiencies in fruit/vegetable foliage
- Improving fruit/vegetable solidity and its ability to maintain a longer shelf/storage life
- Preventing bitter pit
- Preventing stem-end rot in tomatoes

Application

3-4 treatments during growth, as listed below.

Dosage

0.3-0.4% per spraying

500-800 cc/dunam for fertigation

Spray Volume

- Plantations 100-150 l/dunam
- Vines and vegetables 60-80 l/dunam
