

Nutrition and Fertilizer

Mobile K

Fertilizer containing Bicarboxylic Potassium for Rapid Absorption |
Contains: 27% Potassium K₂O

General

The product is a liquid fertilizer containing organic potassium in bicarboxylic acid form, which promotes rapid absorption and efficient motility in the plant. The preparation was especially developed to improve fruit quality, appearance, size and homogeneity and is especially suited for problems with potassium absorption and motility due to problematic environmental conditions.

Crop	Spray Dosage	fertigation Dosage	Total Application
Vegetables	200-300 cc/dunam	200-300 cc/dunam	Every 10-15 days from fruit formation
Leafy crops	200-300 cc/dunam	200-300 cc/dunam	Every 10-15 days in difficult absorption conditions
Citrus and subtropics	0.25-0.5%	250-500 cc/dunam	2-3 applications during fruit growth
Fruit trees, olives and vines	0.25-0.5%	250-500 cc/dunam	2-3 applications during fruit growth
Cereals and ornamental plants	100-150 cc/dunam	250-500 cc/dunam	1-2 applications in difficult absorption conditions
